TMIT National Test Bed Work Shop:

Impact of Hospital-Acquired Conditions
and
NQF Safe Practices

CEO’s Meet Your New
Revenue Preservation Officer…Your PSO

Charles Denham MD
September 4, 2008

- 34 Safe Practices

Criteria for Inclusion
- Specificity
- Benefit
- Evidence of Effectiveness
- Generalization
- Readiness

Harmonization – The Quality Choir

- AHRQ
- NQF
- Joint Commission on Accreditation of Healthcare Organizations
- THE LEAP FROG GROUP for Patient Safety
- INSTITUTE FOR HEALTHCARE IMPROVEMENT
- CMS
The Patient – Our Conductor

From Harmony to Healing: Join the Quality Choir
Charlie R. Prohaska, MD

2009 NQF Report

- Culture
- Consent & Disclosure
- Work Force
- Information Management & Continuity of Care
- Medication Management
- Healthcare Assoc. Infections
- Condition & Site Specific Practices

Safe Practices for Better Healthcare
CHAPTER 2: Creating and Sustaining a Culture of Patient Safety

- Leadership Structures & Systems
- Culture Measurement, Feedback and Interventions
- Teamwork Training and Team Interventions
- Identification and Mitigation of Risks and Hazards

NEW:

- All four have been separated into individual practices and Risk Identification and Mitigation has modest substantive changes harmonized with CMS HAC's.
CHAPTER 4: Workforce

- Nursing Workforce
- Direct Caregivers
- ICU Care

NEW:
- Nothing – No Substantive Changes

CHAPTER 5: Information Management & Continuity of Care

- Critical Care Information
- Labeling Studies
- Discharge Systems
- Safe Adoption of Integrated Clinical Systems including CPOE
- Order Read-back
- Abbreviations

NEW:
- Order Readback and Abbreviations Combined into one practice.
CHAPTER 4: Workforce

- Influenza
- ICU Care
- Read-back
- Modifications & Systems
- Consent & Disclosure
- Workforce
- Nursing Workforce
- Care of the Caregiver
- Informed Consent
- Life Sustaining Treatment
- Disclosure
- Identification and Mitigation of Risks and Hazards
- Teamwork Training and Team Interventions
- Feedback and Interventions
- Leadership Structures & Systems
- Culture Measurement, Feedback and Interventions
- BSI Prevention
- Healthcare Associated Infections
- Healthcare Associated Pneumonia
- Central Venous Blood Stream Infection Prevention
- Surgical Site Infection Prevention
- Preventing Aspiration and Ventilator Associated Pneumonia
- Hand Hygiene
- Influenza Prevention
- Central Venous Catheter Related Blood Stream Infection Prevention
- Surgical Site Infection Prevention
- New: VAP expanded to Care of the Ventilated Patient
- Central Venous BSI – Major Updates
- New Urinary Tract Infection Practice
- New Multi-Drug Resistant Organism
- Surgical Site Infections – Major Updates

CHAPTER 6: Medication Management

- Pharmacist Role
- Medication Reconciliation
- High-Alert Medications
- Standardized Medication Labeling & Packaging
- Unit Dose Medications

NEW:
- Pharmacist Role is expanded and High-Alert Medications, Standardized Medication Labeling & Packaging, and Unit Dose Medications
- Medication Reconciliation – Synched with Joint C.
CHAPTER 8: Condition or Site Specific Practices

• Evidence Based Referrals
• Anticoagulation Therapy
• DVT/VTE Prevention
• Pressure Ulcer Prevention
• Wrong Site, Wrong Procedure, Wrong Person
  Surgery Prevention
• Peri-operative Myocardial Infarct/Ischemia Prev.
• Contrast Media-Induced Renal Failure Prevention

New:
• Evidence Based Referrals DISCONTINUED
• Anticoagulation Therapy – Substantive Update
• DVT/VTE Prevention – Substantive Update
• Wrong Site, Wrong Procedure, Wrong Person
  Surgery Prevention – Substantive Update
• Peri-operative Myocardial Infarct/Ischemia Prevention - DISCONTINUED
• Contrast Media- Gdolinium ADDED

Practice Line Up Changes:
• Culture Practice Elements Broken up into 4 Practices
• 2 Practices Discontinued
• 4 Medication Management Practice combined into 1
• 2 Communication Practices Combined into 1
• 7 New Practices Added
• CMS Care Settings Defined
• Patient and Family Involvement Section Added

Final Report:
• Format Structure Preserved
• Lightly Edited Text of Most Practices
• New Practices
• Updated References
• Corrections and Clarification
• Care Setting Clarification using CMS Classification
• Measures To Be Considered (in formulation)
• Softcopy Document Hyperlinks
• Cross-walk Tables
• Glossary
### Crosswalk: CMS Hospital Acquired Conditions WITH NQF Safe Practices (2008)

#### Go Into Effect October 1, 2008:

<table>
<thead>
<tr>
<th>CMS Hospital Acquired Conditions</th>
<th>2009 NQF Safe Practice Crosswalk</th>
</tr>
</thead>
<tbody>
<tr>
<td>Foreign Object Retained After Surgery</td>
<td>SP4: ID &amp; Mit. Risk/Hazards</td>
</tr>
<tr>
<td>Air Embolism</td>
<td>SP4: ID &amp; Mit. Risk/Hazards</td>
</tr>
<tr>
<td>Blood Incompatibility</td>
<td>SP4: ID &amp; Mit. Risk/Hazards</td>
</tr>
<tr>
<td>Stage III &amp; IV Pressure Ulcers</td>
<td>SP 27: Pressure Ulcers &amp; SP 4: ID &amp; Mit. Risk/Hazards</td>
</tr>
<tr>
<td>Falls and Trauma</td>
<td>New SP 33: Falls &amp; SP 4: ID &amp; Mit. Risk/Hazards</td>
</tr>
<tr>
<td>Catheter-Associated Urinary Tract Infection</td>
<td>New SP 25: CAUTI</td>
</tr>
<tr>
<td>Vascular Catheter-Associated Infection</td>
<td>SP 21: Blood Stream Infections</td>
</tr>
<tr>
<td>SSI-Mediastinitis after CABG</td>
<td>SP 22: SSI</td>
</tr>
</tbody>
</table>

#### Candidate Conditions Originally Considered to Go Into Effect October 1, 2008

<table>
<thead>
<tr>
<th>CMS Hospital Acquired Conditions</th>
<th>2009 NQF Safe Practice Crosswalk</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ventilator associated Pneumonia</td>
<td>SP 23: Care of Ventilated Patient</td>
</tr>
<tr>
<td>Staph aureus septicemia</td>
<td>SP 21: Blood Stream Infections</td>
