FAILURE TO RESCUE

topics I would like to be FURTHER covered include:

- Best players on the team!
- Bowel obstructions
- Building efficiency in nursing staffing and work patterns to obtain data that feed "nurse worry"
- Clinical alarm fatigue
- Device integration to aide in real time documentation for improved decision support using a ews model
- Discussion of most common failure points
- Early identification of sepsis
- Geriatric patients
- How to implement in a smaller facility
- How to manage in smaller, rural hospitals
- How to use a portion of this research in a small community hospital (no residents) where nursing has to escalate because there is no "real time" supervising MD
- Implementation of an EWS in a smaller hospital
- More detail on these types of EWS
- More details on triage
- More on sepsis Nursing intuition on patient care
- Outcome measurements of RRT performance
- Sepsis - qsofa
- Slow bleeds
- What are best effective recognition activities when an early warning system is not in place
- What is the next step to utilized this information
- What type of training do nurses receive on MEWS and other early warning systems?
- Worry factor scoring

FAILURE TO RESCUE

topics I would like to be covered first include:

- Change management and nursing involvement
- How to implement in a smaller facility
- Process breakdown detection
- Real time documentation entry to improve accuracy of the scores
- Building inter professional communication pathways to improve responsiveness to alerts
- Same
- Training the nurse of <1 year to increase perception of patient deterioration
- More detail about evidence based computerized early warning tools and alerting,; what elements are important; and other opportunities to address other common failures
- How does the RRT integrate into the alert system described

Anonymous Survey Questions

I am interested in TRIAGE performance improvement topics.

Source: TMIT High Performer Webinar Series; 2017 Threats & Safety Failure to Rescue: Bedside Patient Rescue A Great Opportunity – April 20, 2017

TRIAGE

topics I would like to be covered first include:

- How to pick which patients go to which floor
- Sepsis
- Care team efficiency and ensuring that the patient is admitted to the correct area more on admission to appropriate location from the ED
- Wrong level of care or inappropriate level of care and how to make sure patients are admitted to the floor that can care for them appropriately
- Direct admissions
- Directing end stage disease process patient to better resources such as hospice and palliative directing end stage disease process patient to better resources such as hospice and palliative care
- Stroke versus MI patient
- CVAs, ectopic pregnancies, aortic aneurisms
- Admission triage
