- None
- None
- Not sure
- Stay informed
- Strong immunity and vaccine recommendations
- Warning

Anonymous Survey Questions

Misinformation about the Coronavirus Crisis is a major problem

Source: TMIT high performer webinar series; Pandemic Preparedness Part 2: Surfing the Next Wave with Security – July 16, 2020

What MISINFORMATION information would you like to have CLARIFIED?

- Access to healthcare in rule areas
- Actively address those who are knowingly spreading misinformation or making unsubstantiated claims.
- Actual rates
- Efficacy of vaccines.
- Everything trump has contributed to
- Evidence for science not conspiracy theory
- How masks work
- I don't think i need clarification, but information on to address misinformation when we come upon it, especially with addressing people about their misinformed beliefs.
- I understand
- Impact on young adults
- Information based on science
- Mask effectiveness in preventing COVID 19
- Masks pros and cons ; trump's lies
- Multiple sources/levels of concern
- Protection of self and others with masks at all times or just inside stores?
- The actual data on positive cases broken down by severity - asymptomatic, mildly symptomatic not hospitalized & hospitalized.
- Very clear presentation
- What is fact and what is fiction
- Where are the case numbers coming from? Is a location tagged based on where the person was screened/diagnosed, location they contracted or home address?

Anonymous Survey Questions

Personal attacks on experts and caregivers is a major problem

Source: TMIT high performer webinar series; Pandemic Preparedness Part 2: Surfing the Next Wave with Security – July 16, 2020

What do you believe can be done about defamation of experts?

- A new president that believes in science and defers to the experts and treats people/experts with respect.
- Consistent messages
- Continually give accurate information and refute false claims.
- Don't know
- Education of the masses
- Have a panel of experts - not a sole expert who may or may not be trustworthy
- Making sure true information and data is given truthfully
information and data is given
- Media is not objective, they fuel the defamation as political agenda. HOLDING media accountable
- Minimize social media and the remove the current president.
- More communication regarding the 'new-ness' and dealing with the unknown before of a novel coronavirus.
- Other experts need to continue to support and reinforce experts. It helps when a group of experts comes out and formally (letter, other written forum) addresses the defamation and reinforces the correct information.
- People should employ ethical practice when making derogatory statements in media. Think before you speak! Discuss issue with person and not debate in media.
- Politics have no place in this discussion
- Remain positive and support
- Speak up at every opportunity to defend and promote science and the experts who study it.
- Stand in unity and support experts
- Stand your ground, stay with the facts
- Support for the experts
- Trust and role modeling from our country leaders which is not happening in the white house!
